

Partnership To End Malaria

5 July, 2021

MSWG Meeting – CRSPC Roles

Daddi J Wayessa (MD, MPH)
CRSPC Manager

Country/Regional Support Partner Committee

- The purpose of the Country/Regional Support Partner Committee (CRSPC) is to provide a platform to engage the RBM Partnership community **in coordinating support to countries and regions** as they execute their malaria control and elimination implementation programs.
- The decision of the most appropriate level of support is through a **triage** mechanism.
 - It is not intended that any RBM country/regional support will compete with or duplicate existing mechanisms that are already in place and working effectively.
 - Where capacity exists at country level, the support will be provided at that level.
 - Where there are gaps in capacity at country level to address a technical or implementation area, coordinated support will be provided at a regional level, and then from global level.

End Malaria Council (EMC) and/or End Malaria Fund (EMF)

End Malaria Councils are multisectoral, high level bodies working to keep malaria high on the advocacy, funding and development agenda

- CRSPC provides support to establish and support the implementation of EMCs and EMFs. To date five councils and funds have been established:
 - Eswatini
 - Zambia
 - Mozambique
 - Uganda
 - Kenya
- ***Advanced:*** DRC, Burkina Faso, Rwanda Gabon, South Africa, Cameroun are all at an advanced stage of planning
- ***Designing:*** Nigeria

Examples of Resources Mobilised

- These councils have helped to keep malaria high on the political and Development agenda during the COVID-19 pandemic and have mobilised considerable resources including in-kind support.
- For example:
 - Mozambique: at a recent private sector round table, approximately US\$3 million was pledged to the fight against malaria
 - Zambia: US\$500,000 was raised to fund the Mass Drug Administration
 - Eswatini: the fund supported the Indoor Residual spraying, and procurement of case management commodities
 - Uganda: the council is supporting training of private sector providers in case management and providing enhanced advocacy support
 - Kenya: End Malaria Council is exploring opportunities to promote local manufacture of essential health commodities.

2. Support to other multisectoral activities:

- Support to country specific multi-sectoral engagement guidance documents. These include Zambia and Zanzibar
- CRSPC organised the NMCP managers orientation meeting on the multi-sectoral engagement guidance document.

3. Zero Malaria Starts with Me campaign

- RBM through the CRSPC provides support to countries in launching and roll out of ZMSWM campaign including provision of guidance documents, financial support for the launch and for local consultants to assist in roll out of the campaign.
- CRSPC also supports countries to develop plans to roll out to sub-national levels, include ZMSWM in their NSPS and GF funding requests etc
- The Zero Malaria Starts with me campaigns have helped to maintain malaria high on the agenda during the COVID-19 pandemic.
